

Three Points of View

This information has been compiled to provide vital information that is clear, concise and factual. The information you are about to see and hear may shock you however if you believe that your health, freedoms and wellbeing are a fundamental right for you and your loved ones, you must see *the other side of the story*.

Australia

Medical – Health implications you must know!

Dr Judy Wilyman

I have been studying the vaccination topic both formally and informally since 1993 when I vaccinated my first child. Like most people questioning vaccines, I have not come from an anti-vaccination position and the debate is not about pro- or anti-vaccination. It is about the safety, efficacy and necessity for each vaccine on the schedule. Are they all safe? And are they all effective and necessary?

Constitutional Law in Australia – Australians; Why Abandon Our Freedoms?

Professor Augusto Zimmerman

Dr Augusto Zimmermann is a Senior Lecturer and former Associate Dean (Research) and Director of Postgraduate Studies at the School of Law at Murdoch University. He is currently Professor of Law at Sheridan College in Perth, Western Australia and also Professor of Law (Adjunct) at The University of Notre Dame Australia, Sydney Campus.

“Authoritarianism is undermining the spirit of the Constitution in this county”.

United States of America

Medical – A Pathologist Summary of What these Jabs do to the Brain and Other Organs

Dr Ryan Cole

Dr Cole has worked around medicine for more than 30 years, according to a resume sent to commissioners. He attended the U.S. Air Force Academy before graduating from Brigham Young University in 1993 with a bachelor's degree in premedicine zoology. He then attended medical school at Virginia Commonwealth University, where he graduated in 1997. He also was a resident and then a fellow of surgical pathology at the Mayo Clinic in Rochester, Minnesota. His professional career has largely been spent in the Treasure Valley. He worked at Saint Alphonsus Regional Medical Centre before working as the CEO and medical director of Cole Diagnostics since 2004. He has also worked as a consultant at the Boise Veteran's Affairs Hospital, a spokesperson for the College of American Pathologists and various other consulting positions.

These highly qualified and respected individuals are but a small number of the many thousands of legal and medical professionals from across the world who believe that it is imperative that everyone, for the sake of their health and that of their families, must hear another point of view.
